COMPANY

Mining Farm Italia is a Novus Chain srl and Levita Srl project.

Levita Srl was born as a CLOUD PROVIDER (www.levita.cloud) and offers services related to cloud computing and virtual servers - such as: web hosting, domain and DNS management, storage, cloud database, cloud attendance detection, cloud video surveillance, design / creation of websites and e-commerce, drones' shooting, IT security, business continuity and disaster recovery and it is provided with its own SERVER FARM available which hosts about 2,500 hosted sites and 5,000 web domains managed for more than 2,500 customers .

With time and years of experience, Levita has now specialized not only on the provision of cloud services, but also on IT training and BlockChain. Finally Novus Chain Srl created its own brand name "Mining Farm Italia"; filed under the special section of the business register; that is totally dedicated to the design, development and marketing of products and services based on BlockChain technology. Specifically, the BlockChain is a shared and non-alterable database, used for recording a history of transactions. This communication protocol allows the development of a new generation of transactional applications that provides trust, accountability and transparency to its users, since transactions and registrations are protected from changes and subsequent revisions, from cancellation attempts and from alteration of any kind or type.

Our Company owns a mining farm of about 900 square meters, that uses facilities for over 350,000 KW per year, powered by renewable energy, in order to guarantee almost total autonomy and energy independence.

The Farm has been operational since February 2018 as a MINING FARM and it is, from an innovative point of view, a production facility of the highest technological level equipped with 24/7 alarm and monitoring systems. All systems are redundant in order to guarantee the maximum possible uptime.

ABSTRACT

The investments market is changing. Business methods are changing so quickly that classic rules and exchange regulations are actually facing a true revolution. Technological innovation has completely transformed the markets with e-business and cryptocurrencies, which have now established themselves in our society to the point of marking a dividing line between the before and after.

Cryptocurrencies currently play a central role for companies that have long-term goals and are projected into the future; in fact some companies already offer the option to their employees to receive their salary in crypto and to their customers to pay for goods and services using cryptocurrencies.

It is increasingly important for companies to differentiate their products and thanks to the progress we are witnessing, it is now possible to implement new resources capable of creating value for the entire social environment. It is always difficult to predict the future, but by now we can risk that the Web, cryptocurrencies and technological development in general are the new three players in the world and business.

MISSION

Our main goal is to offer the miningfarmitalia.it services to an ever-growing audience of companies and individuals, through the MF (Mining Farm) token: link between our customers and the world of professional mining.

Medium-long term investments such as housing, cloud mining and rig purchase services will become even more convenient and more easy to reach for those who use MF Token.

In our shop you will be able to have access to numerous promotions that will give Token holders priority and privileges for the most requested services. With MF you can immediately buy real assets. That is why a solid economic base is created through the private sale of the token to our regular customers, so that the value of the token remains stable once it is placed on the market. Therefore it is our founders, our most loyal customers, who decide to invest in MF Token through private agreements.

We see in MF, a crypto token that has the possibility to set itself into a new rapidly expanding market niche, as the sale of machines and services associated with cryptocurrency mining, starting from services and products of [Miningfarmitalia.it](https://miningfarmitalia.it).

Unlike many other tokens, which have no value before crowdfunding, MF can be immediately used to purchase our goods, even before the sales campaigns are over.

We see in professional mining an important possibility for our customers who, through the Token, become part of a privileged elite in this sector.

Although it is common to think that mining or activities related to cryptocurrencies are not eco-sustainable, we are convinced that the technologies developed on the blockchain can be a keystone for environmental sustainability; stimulating progress and sensitivity towards renewable energies, in order to obtain greater profits from mining, can finally create a system that brings benefits both to the environment and to investments.

Mining Farm Italia is an eco-friendly company, it supports a business model that invests in mining using solar and hydroelectric resources to meet its energy needs; technology at the service of others is the distinctive matrix of Mining Farm Italia.

The goal is to actively involve companies and individuals in participating on the economic and environmental revolution we are witnessing.

MF Token is the tool that allows investors to conveniently start entering an ecosystem of products and services aimed at increasing their capital by exploiting the potential of cryptocurrencies.

MF token, unlike many other cryptocurrencies, is a project that bases its roots on a real business that has been running for years, Mining Farm Italia develops its own volume just from selling products and at the same time places itself on a growing market that can increase its capitalization.

We are a real project, as real as our mining farm is made up of professionals who work daily on Mining Farm Italia projects. For this reason, we can not offer exceeding discount percentages on the sale of our Token. Having set ourselves the goal of selling our products using MF Token, we do not want to allow an uncontrolled devaluation to be created due to too high bonuses, which is harmful for us as well as for our customers.

TEAM

MiningFarmItalia, a company that has believed in professional mining for years.

Located in the Umbrian hills in the green heart of Italy, powered by renewable energy, controlled by alarm systems and active monitoring 24/7, our mining farm is among the first Italian companies dedicated to professional mining.

A team of experts and a research laboratory specialized in digitization are constantly dedicated to the design and development of high-performance and qualitatively innovative products and services. Only with the development of more and more advanced technologies is it possible to guarantee a higher quality that satisfies our customer's needs.

In our mining farm it is possible to safely and efficiently mine Ethereum and a large number of other crypto.

Mining Farm Italia will introduce MF (Mining Farm Token) a crypto that gives our customers privileges purchasing on the MiningFarmItalia.it platforms.

Tokens purchased in staked stocks will be blocked until 31-12-2022

5% of the MF spent on our site will be returned to your wallet, on all MiningFarmItalia.it products purchased with our MF token.

MF TOKEN

The Mining Farm Token (MF), is a token based on Ethereum (ERC20) blockchain; Ethereum is open source, based on blockchain, distributed on an IT platform oriented towards smart contracts.

Smart contracts are applications stored on the Ethereum blockchain. These contracts are cryptographically secure and can verify or enforce the performance of the contract.

The following technology was chosen because these tokens are based on Ethereum, and this platform allows us to create smart contracts and dApps that are crucial for the management of the token; moreover, as today, the ERC20 network is still the safest, a quality that in our case has priority over everything else, since MF token is a crypto which you can buy real assets with. Furthermore, in 2022 we are expecting a Ethereum update, that aims at lowering the costs for transaction fees (gas).

From now on it will be possible to purchase MiningFarmItalia 's products and services using the MF Token.

MF Token price will remain locked until the end of the Sale, in which it will be possible to take advantage of 5% cashback of the products in our shop.

GET TOKEN

To buy MF Token you must have a ERC20 wallet.

<https://metamask.io/>

In order to purchase the token from **www.MiningFarmItalia.it** you will need to register or simply login on our reserved area.

Once the sale period will be over, you will still be able to buy the token through our shop and the sale will be listed on the blockchain. The actual value of the token will depend on the market value.

On miningfarmitalia.it there will always be active promotions for whom wants to use MF Token as payment method, and that will be the most convenient way to make purchases in our shop.

BOUNTY CAMPAIGN

A total of 500,000.00 MF Tokens will be released for Bounty campaigns and for Airdrops.

The remaining Tokens from the first Bounty Campaign will be reinvested for future campaigns, that will be announced and published on our channels: Facebook, Instagram, Telegram, Twitter, Youtube, Discord of our community.

Our first campaign will start on the 22/02/2022.

All our partners will start following our channels on Telegram, Discord, the “Mining Farm Italia” page on Facebook and Instagram and @MFToken on Twitter.

The Bounty Campaign will be open for every Hunter that wants to take part on MFToken sponsoring campaign.

The Bounty Campaign will happen as follows:

- Sponsor on Twitter and, later on, one of your choice between Instagram or Facebook
- Post a YouTube video that explains the MFToken project;

If you want to increase your reward, it is recommended that you use all available channels.

Do you want to become Sheriff ? Contact us at: **mftoken@miningfarm.it**

Our Hunters' Bounty Campaigns will be verified by specialized technical systems. The Sheriff will be responsible on permanently ban those users that do not follow the criteria needed to meet the requirements, so that those users will not be able to take part on following campaigns.
